EDUCATION

Bachelor of Petroleum Engineering (Hons) with Data Analytics (Asia Pacific University of Technology & Innovation)

CGPA: 3.96/4.00 | (Expected Sep 2027)

SELECTED TECHNICAL PROJECTS

Reservoir Strategy Lead | IPFEST 2026 – Geothermal Development Plan Competition

- Optimised gas-injection placement across 3 development models using tNavigator, increasing projected cumulative production from 35.55 to 37.68 MMSTB through improved pressure maintenance.
- Evaluated dynamic reservoir response and gas-cap sweep under competition deadlines, then defended the development strategy before upstream industry evaluators.

Production / Field Engineer | Dulang Offshore Field – Nodal Analysis

- Diagnosed production constraints in a mature CO₂-rich offshore well using Fetkovich IPR, Beggs–Brill VLP and choke modelling, reconciling inconsistent field/PVT inputs before simulation.
- Identified tubing as the dominant constraint after stimulation reduced skin 45 → 12.6 but rate increased only 559.3 → 721.2 STB/d; evaluated interventions up to 903 STB/d tubing and 1,500 STB/d ESP.

Offshore Platform Design Engineer | IEM Oil & Gas Platform Competition — 3rd Place

- Co-designed a cylindrical mono-column offshore platform for Limbayong, a 900–1,200 m deepwater field ~120 km offshore Sabah, addressing stability, heave, vortex-induced motion and integrity.
- Integrated ROV inspection, digital-twin monitoring, ultrasonic guided waves, fouling protection and renewable auxiliary power, then defended the concept through technical presentation and Q&A.

LEADERSHIP & ENTREPRENEURSHIP

Product & Strategy Lead | ASEAN-China-India Youth Leadership Summit 2025 — 1st Runner Up

- Worked with 5 teammates from different countries across 4 nights to translate an open-ended regional flood problem into a community-response solution, shaping the product and overall strategy.
- Placed 2nd among teams across ASEAN, China and India, demonstrating rapid problem structuring, cross-cultural coordination and decision-making under severe time constraints.

Founder | FoodUp – ASEAN-China-India Startathon 2025, National Champion

- Developed a condominium-scale food-waste-to-resource system combining black soldier fly larvae and anaerobic digestion, converting an urban waste problem into a circular-resource model.
- Modelled a 250-unit pilot at RM16,850 startup cost and ~3.3-month payback, winning 1st among 70+ teams.

Strategy & Business Development Lead | DOOH Startup

- Entered the OOH advertising industry with no prior domain experience, conducting primary discussions with advertising-industry stakeholders to identify market gaps and shape the platform's value proposition.
- Defined the advertiser–media-owner marketplace direction and subsequently secured interest from 2 investors for post-competition mentoring.

PROFESSIONAL EXPERIENCE

Regional Sales Manager | Ezforge Malaysia

Generated RM50,000 revenue in 6 months through booth-based direct sales of 3D-printed consumer products, managing customer acquisition, pricing and conversion.

AWARDS & CERTIFICATION

Leadership Excellence Award (2025) | MAFC SLS Case Study Challenge – 2nd Runner Up (2026) | PETRONATION PGD UI – Finalist (2026) | PADI Open Water Diver (2026) | UNLDP / ADLP for Girls × CODEX – Selected Participant (2026)

TECHNICAL SKILLS

Reservoir & Engineering : tNavigator, CMG, Petrel, Eclipse, MATLAB, SolidWorks

Programming : Python, C Programming

Office Tools : Microsoft Office Suite, Canva

Languages : English, Malay, Mandarin

Activities : SPE Malaysia Student Member | IWCF Branch Meeting Student Representative | APU Robotics Club – Head of Human Resources
